

What is CYMS Global Data Transfer?

This allows CYS Services to export your file from your losing installation to a secure web site. Your gaining installation will be able to import your basic household information that was exported to the secure web site.

This process is geared to reduce redundancy for our patrons.

What information will be Imported or Exported?

Sponsor and Spouse Information, DoD Financial, Emergency Misc Information, Special Needs Information, Medical, Allergies, and Illnesses Information.

How do you start the process? Ask your losing installation to Export your CYS Services File. The email address that you give to your losing installation will assist the new installation on importing your file.
